

Kumon Introductory Levels

Math

Level 6A: Students begin developing number recognition and number sequencing. They become familiar with numbers up to 10 through counting colorful pictures or dots and reading numbers.

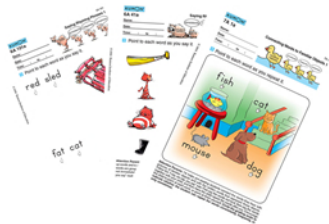

Level 5A: Students read numbers and number tables up to 50. Students count pictures or dots, draw lines to connect numbers, and select the missing number board piece by drawing circles to complete the number table.

Reading

Level 7A: Students begin building the pre-reading skills necessary to becoming emergent readers. Students connect words to familiar objects by pointing to and repeating words after hearing them read aloud.

Level 6A: Students solidify 7A vocabulary, acquire new vocabulary, and continue to build foundational pre-reading skills such as phonemic awareness. Using picture cues, students point to and recite rhyming words, rhyming phrases, and rhyming poems.

Level Z Pencil Skills

Young students are introduced to holding and using pencils or crayons in a fun way. Similar to the math and reading worksheets, the expectations of writing increase incrementally. Through the practice of scribbling and drawing lines, curves and angles, early learners develop pencil skills and engage with the worksheets.
