By downloading the **SCience MANchester app**, you'll be plugging into around 100 activities going on around the city between July 23 - 27 2016. At your fingertips will be a fantastic line-up of digital encounters with science - videos, augmented reality, never-before-seen views of the city, virtual tours and much more!

The app, developed with Spark Compass, uses 'beacon technology' that triggers information depending on your whereabouts in the city and your proximity to a 'beacon' - many of which are being hosted by key organisations, such as the Museum of Science and Industry.

Everyone loves a treasure hunt and this app gives you the chance to stumble upon the city's impressive past, present and future in science and technology.
