Trustmark Corporation Announces First Quarter 2017 Financial Results

JACKSON, Miss. – April 25, 2017 – Trustmark Corporation (NASDAQ:TRMK) reported net income of \$31.2 million in the first quarter of 2017, representing diluted earnings per share of \$0.46. Diluted earnings per share in the first quarter of 2017 increased 7.0% when compared to the previous quarter and 15.0% when compared to the same period in the prior year. This level of earnings resulted in a return on average tangible common equity of 11.39% and a return on average assets of 0.95%. Trustmark's Board of Directors declared a quarterly cash dividend of \$0.23 per share payable June 15, 2017, to shareholders of record on June 1, 2017.

First Quarter Highlights

- Revenue excluding interest and fees on acquired loans increased 4.6% linked quarter and 5.7% year-over-year to total \$138.4 million
- Routine noninterest expense, which excludes ORE and intangible amortization, totaled \$98.7 million, remaining well-controlled from both the prior quarter and year-over-year
- Sustained strong credit performance

Gerard R. Host, President and CEO, stated, "The first quarter marked a great start to 2017 for Trustmark. We maintained and expanded customer relationships by growing loans across our franchise while continuing to maintain solid credit quality. Our low-cost, core deposit base remains a significant strength of the organization. The strong performance of our mortgage and insurance businesses was reflected in solid noninterest income growth. While we continued to make investments to enhance the customer experience, we maintained our focus on disciplined expense management. We recently welcomed the associates and customers of Reliance Bank to the Trustmark family with the completion of our previously announced merger on April 7. We are delighted to serve the greater Huntsville, Alabama, market and look forward to their contributions going forward. Thanks to our talented associates, solid profitability and strong capital base, Trustmark remains well positioned to continue meeting the needs of our customers and creating long-term value for our shareholders."

Balance Sheet Management

- Diversified loan growth demonstrates value of Trustmark's five-state footprint
- Noninterest-bearing deposits represent 31.8% of total deposits
- Capital base continues to provide flexibility in pursuing growth opportunities

Loans held for investment totaled \$8.0 billion at March 31, 2017, an increase of 2.0% from the prior quarter and 10.1% from the comparable period one year earlier. During the first quarter of 2017, Trustmark reclassified \$36.7 million of acquired loans to loans held for investment due to the discount on these loans being fully amortized. Excluding this reclassification, loans held for investment increased \$116.7 million, or 1.5% from the prior quarter and 9.6% from the comparable period one year earlier.

The following discussion of loan growth excludes the aforementioned reclassified acquired loans. Other real estate secured loans, which include multifamily projects, expanded \$79.8 million, which was a result of the migration of construction loans as projects were completed. Construction and land development loans grew \$28.0 million, primarily due to increased construction in Alabama. Nonfarm-nonresidential loans increased \$26.2 million, primarily due to strength in Alabama and Florida. Other loans, which include loans to nonprofits and real estate investment trusts, increased \$11.4 million, driven principally by growth in Alabama, Texas and Mississippi. Single-family home loans decreased \$14.2 million as growth in Alabama and Florida was more than offset by declines in Mississippi and Tennessee. State and other political loans decreased \$7.0 million as growth in Texas and Alabama was more than offset by declines in Mississippi and Tennessee.

Acquired loans totaled \$218.2 million at March 31, 2017, down \$54.0 million from the prior quarter, primarily due to the previously mentioned reclassification of \$36.7 million of acquired loans to loans held for investment. Collectively, loans held for investment and acquired loans totaled \$8.2 billion at March 31, 2017, up \$99.4 million, or 1.2%, from the prior quarter.

Deposits totaled \$10.1 billion at March 31, 2017, remaining stable from the prior quarter. Trustmark continues to maintain an attractive, low-cost deposit base with approximately 60% of deposit balances in checking accounts and a total cost of deposits of 0.16%. The cost of interest-bearing liabilities was 0.34% for the first quarter of 2017.

Trustmark's capital position remained solid, reflecting the consistent profitability of its diversified financial services businesses. At March 31, 2017, Trustmark's tangible equity to tangible assets ratio was 8.80%, while the total risk-based capital ratio was 13.61%.

Credit Quality

- Other real estate decreased 9.8% and 22.1% from the prior quarter and year-over-year, respectively
- Net charge-offs represented 0.08% of average loans
- Allowance for loan losses represented 263.73% of nonperforming loans, excluding specifically reviewed impaired loans

Nonperforming loans totaled \$61.3 million at March 31, 2017, up 24.5% from the prior quarter and down 13.3% year-over-year; the linked-quarter increase was primarily a result of one substandard energy- related credit migrating to nonaccrual status. Other real estate totaled \$56.0 million, reflecting a decline of 9.8% from the previous quarter and 22.1% from the same period one year earlier. Collectively, nonperforming assets totaled \$117.3 million, reflecting a linked-quarter increase of 5.4% and year-over-year decrease of 17.7%.

Allocation of Trustmark's \$72.4 million allowance for loan losses represented 0.97% of commercial loans and 0.67% of consumer and home mortgage loans, resulting in an allowance to total loans held for investment of 0.91% at March 31, 2017, representing a level management considers commensurate with the inherent risk in the loan portfolio. Collectively, the allowance for both held for investment and acquired loan losses represented 1.00% of total loans, which include held for investment and acquired loans.

Unless noted otherwise, all of the above credit quality metrics exclude acquired loans and other real estate covered by FDIC loss-share agreement.

Revenue Generation

- Net interest income (FTE) excluding acquired loans totaled \$97.2 million in the first quarter, an increase of 2.0% from the prior quarter and 5.5% year-over-year
- Net interest margin excluding acquired loans was 3.38%, an increase of 7 basis points from the prior quarter
- Noninterest income totaled \$46.0 million, up 10.3% linked quarter and 6.4% year-over-year

Net interest income (FTE) in the first quarter totaled \$102.4 million, resulting in a net interest margin of 3.49%, down 3 basis points from the prior quarter. Relative to the prior quarter, net interest income (FTE) decreased \$1.1 million as growth in interest income from both the held for sale and held for investment loan portfolios was more than offset by decreased interest income from the acquired loan portfolio as well as increased total interest expense. The yield on acquired loans in the first quarter totaled 8.40% and included recoveries from settlement of debt of \$1.2 million; this compares to \$3.8 million in recoveries from settlement of debt in the prior quarter. Excluding acquired loans, the net interest margin in the first quarter totaled 3.38%, an increase of 7 basis points when compared to the fourth quarter of 2016. The increase was primarily due to growth in the yields on the securities portfolio and the loans held for investment and held for sale portfolios.

Noninterest income in the first quarter increased 10.3% from the prior quarter to total \$46.0 million, as higher mortgage banking revenues and insurance commissions more than offset seasonal reductions in various fee-income categories. Mortgage banking revenue totaled \$10.2 million in the first quarter, up \$4.8 million from the prior quarter and \$1.5 million year-over-year. The linked-quarter change reflects a net positive mortgage valuation adjustment and a net positive mortgage servicing hedge ineffectiveness that more than offset decreased secondary marketing gains. Mortgage loan production totaled \$303.5 million, down 25.4% from the prior quarter and 1.3% year-over-year. Insurance revenue totaled \$9.2 million in the first quarter, up 8.9% from the prior quarter and 7.2% year-over-year; this performance primarily reflects growth in the group health insurance and property and casualty businesses.

Wealth management revenue in the first quarter totaled \$7.4 million, down 1.2% and up 0.1% from the prior quarter and year-over-year, respectively. The linked-quarter decline is primarily attributable to decreased commission-based transactions within investment services. Bank card and other fees declined \$296 thousand from the prior quarter due to seasonal reductions in interchange income and lower revenue on interest rate swaps for commercial loan customers. Service charges on deposit accounts declined \$612 thousand from the prior quarter, reflecting seasonal reductions in NSF and overdraft fees.

Noninterest Expense

- Routine noninterest expense, which excludes ORE and intangible amortization, totaled \$98.7 million, remaining stable from both the prior quarter and year-over-year
- Total noninterest expense increased 1.8% linked quarter and 3.1% year-over-year to \$102.1 million
- Full-time equivalent employees totaled 2,799 at the end of the first quarter, a decrease of 147 or 5.0% when compared to levels one year earlier

Salaries and benefits decreased \$866 thousand from the prior quarter to total \$57.3 million. Services and fees increased 3.9%, or \$581 thousand, linked quarter primarily due to additional advertising and outside services expense. ORE and foreclosure expense totaled \$1.8 million, up from the prior quarter, while net occupancy-premises expense totaled \$6.2 million, down 2.9% from the prior quarter. Other expense totaled \$12.8 million, up \$1.1 million on a linked-quarter basis, primarily due to a property valuation adjustment associated with a branch closure and other miscellaneous expenses.

Trustmark remains committed to diligent expense management. As previously announced, Trustmark terminated its defined benefit pension plan as of December 31, 2016. In order to terminate the plan, Trustmark is required to fully fund the plan on a termination basis and will contribute the additional assets necessary to do so. The final distributions will be made from current plan assets and a one-time pension settlement expense of approximately \$17.5 million (pre-tax) will be recognized when paid by Trustmark during the second quarter of 2017. After the distribution of plan assets during the second quarter of 2017, Trustmark estimates that the annual pension expense will be reduced by \$3.0 million to \$4.0 million.

Note 1 - Business Combinations

On April 7, 2017, Trustmark Corporation (Trustmark) completed its merger with RB Bancorporation. RB Bancorporation, with assets of \$201.2 million as of March 31, 2017, is the holding company for Reliance Bank, which had seven offices serving the Huntsville, Alabama MSA. Reliance Bank was merged into Trustmark National Bank simultaneously with the merger of Trustmark and RB Bancorporation. Under the terms of the Merger Agreement dated November 14, 2016, Trustmark paid \$22.00 in cash for each share of RB Bancorporation common stock outstanding, which represents total consideration for common shareholders of approximately \$23.7 million.

During 2013, Trustmark reclassified approximately \$1.099 billion of securities available for sale to securities held to maturity. The securities were transferred at fair value, which became the cost basis for the securities held to maturity. At the date of transfer, the net unrealized holding loss on the available for sale securities totaled approximately \$46.6 million (\$28.8 million, net of tax). The net unrealized holding loss is amortized over the remaining life of the securities as a yield adjustment in a manner consistent with the amortization or accretion of the original purchase premium or discount on the associated security. There were no gains or losses recognized as a result of the transfer. At March 31, 2017, the net unamortized, unrealized loss on the transferred securities included in accumulated other comprehensive loss in the accompanying balance sheet totaled approximately \$23.0 million (\$14.2 million, net of tax).

Management continues to focus on asset quality as one of the strategic goals of the securities portfolio, which is evidenced by the investment of approximately 96% of the portfolio in GSE-backed obligations and other Aaa rated securities as determined by Moody's. None of the securities owned by Trustmark are collateralized by assets which are considered sub-prime. Furthermore, outside of stock ownership in the Federal Home Loan Bank of Dallas, Federal Home Loan Bank of Atlanta and Federal Reserve Bank, Trustmark does not hold any other equity investment in a GSE.

⁽¹⁾ Trustmark revised the presentation of acquired loans by eliminating the segmentation of acquired noncovered loans and acquired covered loans due to the significantly reduced size of the acquired covered loan portfolio.

During the first quarter of 2017, Trustmark transferred the remaining balance of the acquired loans not accounted for under FASB ASC Topic 310-30, "Loans and Debt Securities Acquired with Deteriorated Credit Quality" to LHFI due to the discount on these loans being fully amortized. The balance of these transferred loans totaled \$36.7 million.

| Net interest margin excluding acquired loans | 3.38% | 3.31% | 3.38% | 3.38% | 3.40% | | | |

Reflected in the table above are yields on earning assets and liabilities, along with the net interest margin which equals reported net interest income-FTE, annualized, as a percent of average earning assets. In addition, the table includes net interest margin excluding acquired loans, which equals reported net interest income-FTE excluding interest income on acquired loans, annualized, as a percent of average earning assets excluding average acquired loans.

During the first quarter of 2017, the yield on acquired loans totaled 8.40% and included \$1.2 million in recoveries from the settlement of debt, which represented approximately 2.02% of the annualized total acquired loan yield. Excluding acquired loans, the net interest margin totaled 3.38% for the first quarter of 2017, an increase of 7 basis points when compared to the fourth quarter of 2016. This increase was primarily due to growth in the yields on the securities portfolio and the loans held for investment and held for sale portfolio.

Note 5 - Mortgage Banking

Trustmark utilizes a portfolio of exchange-traded derivative instruments, such as Treasury note futures contracts and option contracts, to achieve a fair value return that offsets the changes in fair value of mortgage servicing rights (MSR) attributable to interest rates. These transactions are considered freestanding derivatives that do not otherwise qualify for hedge accounting under generally accepted accounting principles (GAAP). Changes in the fair value of these exchange-traded derivative instruments, including administrative costs, are recorded in noninterest income in mortgage banking, net and are offset by the changes in the fair value of the MSR. The MSR fair value represents the present value of future cash flows, which among other things includes decay and the effect of changes in interest rates. Ineffectiveness of hedge instruments to the change in the fair value of the MSR asset attributable to changes in interest rates and other market driven changes in valuation inputs and assumptions. The impact of this strategy resulted in a net positive ineffectiveness of \$2.8 million and \$413 thousand for the quarters ended March 31, 2017 and 2016, respectively.

The following table illustrates the components of mortgage banking revenues included in noninterest income in the accompanying income statements:

Note 6 - Salaries and Employee Benefit Plans

Early Retirement Program

During the second quarter of 2016, Trustmark announced a voluntary early retirement program (ERP) for associates age 60 and above with five or more years of service. The cost of this program is reflected in a one-time, pre-tax charge of approximately \$9.3 million (salaries and employee benefits expense of \$9.1 million and other miscellaneous expense of \$230 thousand), or \$0.085 per basic share net of tax, in Trustmark's second quarter 2016 earnings. As a result of the ERP, during the third and fourth quarters of 2016, Trustmark incurred additional expense of \$236 thousand and \$268 thousand, respectively, which primarily resulted from additional settlements from pension lump sum elections.

Defined Benefit Pension Plan

Trustmark maintains a noncontributory tax-qualified defined benefit pension plan (Trustmark Capital Accumulation Plan, the "Plan"), in which substantially all associates who began employment prior to 2007 participate. The Plan provides retirement benefits that are based on the length of credited service and final average compensation, as defined in the Plan, and vest upon three years of service. Benefit accruals under the plan have been frozen since 2009, with the exception of certain associates covered through plans obtained in acquisitions that were subsequently merged into the Plan. On July 26, 2016, the Board of Directors of Trustmark authorized the termination of the Plan, effective as of December 31, 2016. To satisfy commitments made by Trustmark to associates (collectively, the "Continuing Associates") covered through acquired plans that were merged into the Plan, the Board also approved the spin-off of the portion of the Plan associated with the accrued benefits of the Continuing Associates into a new plan titled the Trustmark Corporation Pension Plan for Certain Employees of Acquired Financial Institutions (the "Spin-Off Plan"), effective as of December 31, 2016, immediately prior to the termination of the Plan. In order to terminate the Plan, in accordance with Internal Revenue Service and Pension Benefit Guaranty Corporation requirements, Trustmark is required to fully fund the Plan on a termination basis and will contribute the additional assets necessary to do so. The final distributions will be made from current plan assets and a one-time pension settlement expense of approximately \$17.5 million will be recognized when paid by Trustmark during the second quarter of 2017. After the distribution of Plan assets during the second quarter of 2017, Trustmark estimates that the annual pension expense will be reduced by \$3.0 million to \$4.0 million.

Trustmark invests in partnerships that provide income tax credits on a Federal and/or State basis (i.e., new market tax credits, low income housing tax credits and historical tax credits). The income tax credits related to these partnerships are utilized as specifically allowed by income tax law and are recorded as a reduction in income tax expense.

Note 8 - Non-GAAP Financial Measures

In addition to capital ratios defined by U.S. generally accepted accounting principles (GAAP) and banking regulators, Trustmark utilizes various tangible common equity measures when evaluating capital utilization and adequacy. Tangible common equity, as defined by Trustmark, represents common equity less goodwill and identifiable intangible assets.

Trustmark believes these measures are important because they reflect the level of capital available to withstand unexpected market conditions. Additionally, presentation of these measures allows readers to compare certain aspects of Trustmark's capitalization to other organizations. These ratios differ from capital measures defined by banking regulators principally in that the numerator excludes shareholders' equity associated with preferred securities, the nature and extent of which varies across organizations. In Management's experience, many stock analysts use tangible common equity measures in conjunction with more traditional bank capital ratios to compare capital adequacy of banking organizations with significant amounts of goodwill or other tangible assets, typically stemming from the use of the purchase accounting method in accounting for mergers and acquisitions.

These calculations are intended to complement the capital ratios defined by GAAP and banking regulators. Because GAAP does not include these capital ratio measures, Trustmark believes there are no comparable GAAP financial measures to these tangible common equity ratios. Despite the importance of these measures to Trustmark, there are no standardized definitions for them and, as a result, Trustmark's calculations may not be comparable with other organizations. Also there may be limits in the usefulness of these measures to investors. As a result, Trustmark encourages readers to consider its consolidated financial statements in their entirety and not to rely on any single financial measure. The following table reconciles Trustmark's calculation of these measures to amounts reported under GAAP.
