

Vertex GPS™: Guidance & Patient Support is a comprehensive program for eligible patients who have been prescribed a Vertex medicine.

Our Vertex GPS Case Managers offer patients and their caregivers ongoing support that includes coordination of insurance benefits, reimbursement assistance and patient education.

Here's how the Vertex GPS program works:

Step 1: ENROLLMENT INTO VERTEX GPS

Eligible patients who have been prescribed a Vertex medicine can enroll in the Vertex GPS program. Doctors can help complete the Vertex GPS enrollment form.

10,000 patients enrolled in GPS since 2012.

Step 2: VERIFYING INSURANCE COVERAGE & REQUIREMENTS

After enrollment, a Vertex GPS Case Manager will review insurance to determine if the medication is covered and whether there are any insurance requirements.

Step 3: COMMUNICATING INSURANCE COVERAGE & OPTIONS

After reviewing benefits, the Vertex GPS Case Manager will inform patients and doctors of coverage and any special requirements. Case Managers may discuss financial support options with eligible patients and their caregivers.

For patients who have commercial insurance, Vertex may be able to reduce their co-pay*

*Limitations apply, and Vertex reserves the right to rescind, revoke, or amend this assistance program at any time.

Step 4: COORDINATION OF PRODUCT DELIVERY

Once the insurance company approves coverage, Vertex GPS will help coordinate delivery of the medicine with an in-network specialty pharmacy. A list of specialty pharmacies within the Vertex network can be found at www.vertexgps.com/faq. The specialty pharmacy will reach out to the patient or their caregiver to set up the first shipment.

Step 5: ONGOING SUPPORT

Vertex GPS™ works to provide a personalized experience for patients and their caregivers. While enrolled in Vertex GPS and on treatment, patients can expect to receive ongoing product and educational support from their Case Managers, including:

Phone calls to discuss any insurance issues, provide monthly refill reminders and schedule regular check-ins

Text messages to give refill and insurance reminders

Educational resources to help keep patients on track with their treatment

Helpful resources and information about their Vertex medicine

Support is available for both English and Spanish speakers.

Vertex GPS also offers online tools that provide patients and caregivers tips and resources; a few examples are below:

Navigating Life Stages: resources for patients to help navigate life stages

- Disease Education
- How to Talk to Others
- Tips for Traveling
- Caregiver's Guide to Transitioning Your Teens From Pediatric to Adult Care
- Preparing for College and Staying on Track
- Center Transition Checklist
- Insurance 101: Understanding Plans and Coverage Options

Delicious Dishes
