Identity on
the move

Secure biometric systems to manage the flow of people

Our world is running at a faster pace. As a result, everyone wants things to move as quickly as possible to avoid long queues - be it when crossing borders, entering the building at work or any other type of facility for that matter.

IDEMIA offers a wide range of biometric solutions to manage peoples' journeys - whether they be tourists at a border, workers at the entrance of their building or visitors at a venue - and to provide an enhanced and seamless experience.

The mobile
generation

Age and identity verification

Let's face it: we have all grown dependent on our mobile phones! We have it everywhere we go. We use them to carry cinema tickets, credit cards, boarding passes, or loyalty cards, and are constantly looking for mobile solutions to make our life easier.

To meet these expectations, IDEMIA enables you to put your ID in your smartphone: there it is safe, under your control and with you all the time. Be it in a shop, in front of a police officer or at the entrance of a night club, you can prove your identity or simply that you are of age just with your phone!

Leisure venue security

Enhancing the fan experience

Game-day! We're excited to go to the stadium to share positive emotions with family or with friends. But excitement can sometimes turn into a frustrating experience when having difficulties to access the car park, being stuck in long waiting lines when the game is about to start, enduring awkward security screening, or desperately spending the whole halftime in packed shops or food corners.

IDEMIA brings its technological expertise to leave physical tickets, IDs, cash or payment cards out of the stadium. Fans can enjoy a smoother game-day experience thanks to faster flow outside and inside the venue. For stadiums, clubs and federations, our solutions increase revenues by enhancing the efficiency of their points of sales, all the while improving their customers' security with advanced control systems.

Biometrics solutions for private service providers

Physical and digital continuity

At IDEMIA, we ensure continuity between the physical and the digital space. With biometrics and security at the core of our DNA, we also help private companies and service providers secure digital onboarding and authentication processes of their customers, as well as trusted digital identities and transactions.

Let's discover how biometrics can be leveraged to replace the PIN of your payment card or to open an application on your phone or how IDEMIA's security makes it possible to perform proximity payment with Bitcoins.

Visitors Opening Hours

Monday 25th June 11:00 to 17:30

Tuesday 26th June 9:00 to 17:00

Wednesday 27th June 9:00 to 15:30

ABOUT IDEMIA OT-Morpho is now IDEMIA, the global leader in Augmented Identity, with the ambition to provide a secure environment enabling citizens and consumers alike to perform their daily critical activities (such as pay, connect, travel and vote), in the physical as well as digital space. Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Public Security and IoT sectors. OT (Oberthur Technologies) and Safran Identity & Security (Morpho) have joined forces to form IDEMIA. With close to \$3 billion in revenues and 14,000 employees around the world, IDEMIA serves clients in 180 countries.
