${ }^{(1)}$ Amounts include the impact of acquisition and divestiture-related costs, restructuring costs and certain other items. See accompanying tables for details.
${ }^{(2)}$ Materials and production costs in the third quarter and first nine months of 2018 include a $\$ 420$ million aggregate charge related to the termination of a collaboration agreement with Samsung Bioepis Co., Ltd. (Samsung) for insulin glargine.
${ }^{(3)}$ Research and development expenses in the first nine months of 2018 include a $\$ 1.4$ billion aggregate charge related to the formation of a collaboration with Eisai Co., Ltd. (Eisai), as well as a $\$ 344$ million charge for the acquisition of Viralytics Limited. Research and development expenses for the third quarter and first nine months of 2017 include a $\$ 2.35$ billion aggregate charge related to the formation of a collaboration with AstraZeneca PLC (AstraZeneca).
${ }^{(4)}$ Represents separation and other related costs associated with restructuring activities under the company's formal restructuring programs.
${ }^{(5)}$ Because the company recorded a net loss in the third quarter of 2017, no potential dilutive common shares were used in the computation of loss per common share assuming dilution as the effect would have been anti-dilutive.
${ }^{(6)}$ The effective income tax rates for the third quarter and first nine months of 2018 include the unfavorable impact of a $\$ 420$ million aggregate pretax charge related to the termination of a collaboration agreement with Samsung for which no tax benefit was recognized. The effective income tax rate for the first nine months of 2018 also reflects the unfavorable impact of a $\$ 1.4$ billion aggregate pretax charge related to the formation of a collaboration with Eisai for which no tax benefit was recognized. The effective income tax rates for the third quarter and first nine months of 2017 reflect the unfavorable impact of a $\$ 2.35$ billion aggregate pretax charge related to the formation of a collaboration with AstraZeneca for which no tax benefit was recognized, partially offset by the favorable impact of a net tax benefit of $\$ 234$ million related to the settlement of certain federal income tax issues.

Average Shares Outstanding Assuming Dilution ${ }^{(1)}$ Tax Rate

* $100 \%$ or greater

Sum of quarterly amounts may not equal year-to-date amounts due to rounding
On January 1, 2018, the company adopted a new accounting standard related to defined benefit plans that requires the components of net benefit cost/credit (other than service costs) be presented in the statement of income outside of operating expenses. Upon adoption, net periodic benefit cost/credit other than service cost was reclassified to Other (income) expense, net from the previous classifications within Materials and production costs, Marketing and administrative expenses and Research and development costs. Previously reported amounts have been reclassified to conform to the new presentation. There was no impact to net income as a result of adopting the new standard.
${ }^{(1)}$ Because the company recorded net losses in the third and fourth quarters of 2017, no potential dilutive common shares were used in the computations of loss per common share assuming dilution as the effects would have been anti-dilutive.

Only the line items that are affected by non-GAAP adjustments are shown.
Merck is providing certain non-GAAP information that excludes certain items because of the nature of these items and the impact they have on the analysis of underlying business performance and trends. Management believes that providing this information enhances investors' understanding of the company's results as it permits investors to understand how management assesses performance. Management uses these measures internally for planning and forecasting purposes and to measure the performance of the company along with other metrics. Senior management's annual compensation is derived in part using non-GAAP income and non-GAAP EPS. This information should be considered in addition to, but not as a substitute for or superior to, information prepared in accordance with GAAP.
${ }^{(1)}$ Amounts included in materials and production costs reflect expenses for the amortization of intangible assets recognized as a result of business acquisitions. Amounts included in marketing and administrative expenses reflect integration, transaction and certain other costs related to business acquisitions and divestitures. Amounts included in research and development expenses primarily reflect an increase in the estimated fair value measurement of liabilities for contingent consideration. Amounts included in other (income) expense, net primarily reflect royalty income, partially offset by an increase in the estimated fair value measurement of liabilities for contingent consideration related to the termination of the Sanofi-Pasteur MSD joint venture.
${ }^{(2)}$ Amounts primarily include employee separation costs and accelerated depreciation associated with facilities to be closed or divested related to activities under the company's formal restructuring programs.
${ }^{(3)}$ Amount included in materials and production costs represents an aggregate charge related to the termination of a collaboration agreement with Samsung Bioepis Co., Ltd. for insulin glargine.
${ }^{(4)}$ Represents the estimated tax impact on the reconciling items based on applying the statutory rate of the originating territory of the non-GAAP adjustments.

## MERCK \& CO., INC. <br> OTHER (INCOME) EXPENSE, NET - GAAP <br> (AMOUNTS IN MILLIONS)

## (UNAUDITED)

Table 4

## OTHER (INCOME) EXPENSE, NET

On January 1, 2018, the company adopted a new accounting standard related to defined benefit plans that requires the components of net benefit cost/credit (other than service costs) be presented in the statement of income outside of operating expenses. Upon adoption, net periodic benefit cost/credit other than service cost was reclassified to Other (income) expense, net from the previous classifications within Materials and production costs, Marketing and administrative expenses and Research and development costs. Previously reported amounts have been reclassified to conform to the new presentation There was no impact to net income as a result of adopting the new standard.

[^0]:    ${ }^{(1)}$ Amounts included in materials and production costs reflect expenses for the amortization of intangible assets recognized as a result of business acquisitions. Amounts included in marketing and administrative expenses reflect integration, transaction and certain other costs related to business acquisitions and divestitures. Amounts included in research and development expenses primarily reflect an increase in the estimated fair value measurement of liabilities for contingent consideration. Amounts included in other (income) expense, net primarily reflect an increase in the estimated fair value measurement of liabilities for contingent consideration, partially offset by royalty income related to the termination of the Sanofi-Pasteur MSD joint venture.
    ${ }^{(2)}$ Amounts primarily include employee separation costs and accelerated depreciation associated with facilities to be closed or divested related to activities under the company's formal restructuring programs.
    ${ }^{(3)}$ Amount included in materials and production costs represents an aggregate charge related to the termination of a collaboration agreement with Samsung Bioepis Co., Ltd. for insulin glargine. Amounts included in research and development expenses represent a $\$ 1.4$ billion aggregate charge related to the formation of a collaboration with Eisai Co., Ltd., as well as a $\$ 344$ million charge for the acquisition of Viralytics Limited.
    ${ }^{(4)}$ Represents the estimated tax impact on the reconciling items based on applying the statutory rate of the originating territory of the non-GAAP adjustments.

[^1]:    ${ }^{(1)}$ Amounts included in materials and production costs primarily reflect expenses for the amortization of intangible assets recognized as a result of business acquisitions. Amounts included in marketing and administrative expenses reflect integration, transaction and certain other costs related to business acquisitions and divestitures. Amounts included in research and development expenses reflect $\$ 245$ million of in-process research and development (IPR\&D) impairment charges and $\$ 26$ million of expenses related to an increase in the estimated fair value measurement of liabilities for contingent consideration. Amount included in other (income) expense, net represents royalty income related to the termination of the Sanofi-Pasteur MSD joint venture.
    ${ }^{(2)}$ Amounts primarily include employee separation costs and accelerated depreciation associated with facilities to be closed or divested related to activities under the company's formal restructuring programs.
    ${ }^{(3)}$ Amount included in research and development expenses represents an aggregate charge related to the formation of a collaboration with AstraZeneca PLC.
    ${ }^{(4)}$ Represents the estimated tax impact on the reconciling items based on applying the statutory rate of the originating territory of the non-GAAP adjustments.
    ${ }^{(5)}$ Represents a net tax benefit related to the settlement of certain federal income tax issues.

[^2]:    ${ }^{(1)}$ Europe primarily represents all European Union countries and the European Union accession markets.
