

Four Leading Providers Join Change Healthcare and Google Cloud in Next-Generation Enterprise Imaging Initiative

Partner Quotes

"We want AI to be able to bring out features and actionable data, particularly structured data, that even a great radiologist could never come up with, no matter how hard they looked at the images." — Gary Wendt, M.D., *Enterprise Director of Imaging, University of Wisconsin School of Medicine and Public Health and UW Health, Madison Wisconsin*

"If our goal is to read the most important case first, nothing is more important than a study with pathology. For the first time, AI allows us to set study priority based on what is actually on the image." — Evan Kaminer, M.D., *Director of Diagnostic Imaging, Montefiore Nyack Hospital*

"Informed clinical decisions empowered by efficient access to imaging data are important to Bronson Healthcare as we strive to improve care coordination while reducing infrastructure costs. We look forward to our clinical teams having unified archival, viewing, and advanced reporting capabilities through this partnership." — Ash Goel, M.D., *Senior Vice President, Information Technology, Chief Information and Medical Informatics Officer, Bronson Healthcare*

Change Healthcare Executive Quote

"Artificial intelligence has a significant potential to enable better outcomes and patient care through improved decision making and more efficient workflows. We believe that collaborations, such as this, between leading providers, researchers, and technology vendors are essential in unlocking the value of AI to enable solutions that deliver real value" — Tracy Byers, *Senior Vice President and General Manager, Change Healthcare Enterprise Imaging*
