

### Ford Records Better-Than-Anticipated Q2 Operating Results As Company Manages for Both Coronavirus and Long Term

- Posts net income of \$1.1 billion, including \$3.5 billion gain on investment in Argo Al
- Reports negative \$1.9 billion more than \$3 billion better than expected in adjusted EBIT, which excludes Argo AI gain, following safe, effective restart of global manufacturing
- Makes further progress in delighting customers, fixing operating fundamentals integrating new technologies, lowering costs and capex, assuring readiness for major product launches
- Finalizes strategic alliance with Volkswagen for commercial vehicles, EVs, pickups
- Maintains strong balance sheet, with more than \$39 billion in cash at end of Q2; this week repaid \$7.7 billion against revolving credit lines
- Expects strongest 2020 adjusted EBIT in Q3; launch plans for new F-150, Mustang Mach-E BEV, legendary Bronco on track keys to accelerating transformation, growing profits

**DEARBORN, Mich., July 30, 2020** – Ford made the most of its business in the midst of coronavirus, progress toward major new-vehicle launches in the near term, and strategic investments in the company's ambitious future during second-quarter 2020.

"I could not be prouder of the Ford team's optimism and effectiveness as we manage through this pandemic," said President and CEO Jim Hackett. "We delivered a strong Q2 while keeping each other safe, caring for customers and neighbors, and assuring tomorrow."

#### Company Key Metrics Summary

Adjusted ROIC (Trailing Four Qtrs)	8.5 %	(3.1) %	(11.6) ppts	N/A %	N/A %	N/A ppts

Ford's **balance-sheet discipline** provided strong liquidity and financial flexibility heading into the economic crisis and through the second quarter. The company ended Q2 with more than \$39 billion in cash, reflecting, in part, \$10 billion in new debt during the quarter.

On July 27, Ford repaid \$7.7 billion of an outstanding \$15.4 billion on its revolving credit facilities, and also extended \$4.8 billion of its three-year revolving credit lines. The company's almost \$40 billion in liquidity today is expected to be sufficient to maintain or exceed a target cash balance of \$20 billion through the second half of this year, even if global demand declines or there is another major wave of pandemic-related plant closures.

"Our global team is delivering great value for customers, performing strongly and advancing the business against extraordinary headwinds," said Ford CFO Tim Stone. "You're seeing us fix things that held us back in the past, accelerate in areas like commercial vehicles and SUVs, and set ourselves up for growth in connectivity, electrification and autonomous vehicles."

In June, **Ford and Volkswagen** finalized agreements that expanded their global alliance, leveraging complementary strengths across an expected combined 8 million commercial and electric vehicles, and midsize pickup trucks. The alliance emphasizes innovation and choice for their respective customers of commercial vehicles and high-performing EVs:

- A medium pickup truck engineered and built by Ford
- A city delivery van developed and made by Volkswagen Commercial Vehicles and a 1-tonne cargo van created by Ford, and
- A highly differentiated Ford EV for Europe based on Volkswagen's Modular Electric Drive, or MEB, toolkit.

Volkswagen also completed its investment in Argo AI, a company in which Ford already had an ownership interest. Ford and Volkswagen will work with Argo AI to independently develop AVs at scale based on Argo AI's innovative self-driving system. Argo AI's SDS, the first with commercial deployment plans for both Europe and the U.S., has the largest geographic potential of any autonomous driving technology to date. Reach and scale are important to developing a robust, cost-efficient SDS.

Ford directed much of its capabilities and resolve in the second quarter to understanding and helping meet **coronavirus-related needs** of customers, dealers, suppliers, healthcare professionals and first responders, and patients and communities. Initiatives like enhanced and new online services and deferred financing payments on new vehicles in the U.S. benefitted customers and Ford as commerce stalled, then began to recover.

Ford's engineering and manufacturing response to enormous global demand for personal protective and other healthcare equipment, much of it in partnership with the United Auto Workers, included production of:

- More than 18 million face shields and 33-plus million face masks
- 50,000 patient ventilators by the end of August
- More than 32,000 powered air-purifying respirators in a collaboration with 3M
- 1.4 million washable isolation gowns a week for three months with suppliers, and
- About 7,500 ambulances, so far, prioritized by JMC, a Ford joint venture in China.

Wholesale shipments, revenue and earnings before interest and taxes in **Ford's Automotive business** were down in Q2 with virtually all of the company's worldwide manufacturing suspended for much of the quarter. Improvements of roughly \$1 billion each in net pricing and costs partially offset the effect of the shutdown on profitability.

When it was appropriate, Ford brought its industrial, marketing, sales and service operations back up safely, efficiently and effectively. All of Ford's regional businesses performed better than April expectations, as they further streamlined underlying operations.

After being idled for six weeks, plants in **North America** smoothly resumed operations and ended the quarter at about 95 percent of their pre-pandemic production levels. Overall Q2 sales were down, but Ford gained more than one full percentage point of retail share on the strength of its F-150 and Ranger trucks, and Explorer and Lincoln Aviator and Corsair SUVs.

Retail share for F-Series was up 2.5 percentage points – to more than 33 percent – just months ahead of production launch of the all-new, 2021 version of the F-150, America's top-selling truck for 38 straight years. In July, the company unveiled reimagined versions of the legendary Bronco, along with the Bronco Sport that will expand the brand.

Launches of F-150, the all-electric Mustang Mach-E and the Bronco family will be major steps in the ongoing transformation of Ford's vehicle lineup – and in the process delight customers, drive growth and increase profitability.

In **Europe**, Ford had all its plants back in operation by May 4. Operating results were favorably influenced by further redesign of the regional business, together with a sharpened focus on Transit commercial vehicles, a category in which Ford had an industry-leading 15-percent share in June; selected passenger vehicles, particularly SUVs and crossovers; and iconic import products.

Coronavirus risks developed and started moderating earlier in **China**, but persisted into Q2. Nonetheless, Ford achieved double-digit, year-over-year gains in wholesale volumes. Growth was driven by introductions of the Ford Escape and Lincoln Corsair, together with strong sales of commercial vehicles. Corsair, the first locally produced Lincoln product, contributed to an increase in Lincoln sales, with the new Lincoln Aviator now being introduced in China. Ford's Q2 share was its highest in nearly two years. Strength in commercial vehicles produced a 34-percent increase in sales at JMC, a Ford joint-venture in China.

All of Ford's regional businesses will benefit from investments in new technologies, including **electrification**. So far, the company has spent about one-half of the more than \$11.5 billion committed through 2022 – with more to follow – to be a leader in EVs. By the end of this year, customers around the globe will be able to choose from 15 electrified Ford nameplates expected to together account for nearly 10 percent of fourth-quarter wholesale volumes.

Among current or planned electric versions of vehicles of strategic importance to Ford are the Territory SUV BEV, already on the road in China; the all-electric Mustang Mach-E, out later this year; Escape and Kuga plug-in hybrids; the F-150 PowerBoost hybrid; and all-electric models of two of the company's most significant vehicles, F-150 and Transit. Electric is also a big part of Lincoln's future.

**Ford Credit** had another strong performance in Q2, demonstrating compelling value to customers and the company's Automotive business. In spite of economic weakness, the unit's portfolio performance was strong, with delinquencies and charge-offs at low levels.

Ford and Ford Credit partnered on two recent programs to help auto customers facing financial hardship during the pandemic. One resulted in extensions of loan and lease payments for about 11 percent of Ford's U.S. customers through May – with more than 90 percent of those customers resuming their payments as of the end of July. Another program, "Ford Promise," gives customers who lose their jobs within 12 months of financing or leasing a new or used, 2019 through 2021 model-year Ford vehicle – from a participating Ford dealer and via Ford Credit – the option to return the vehicle.

#### Outlook

Stone said Ford's expectations for the **second half of 2020** assume no meaningful change in the current economic conditions, continued steady improvement in stability of the global automotive supply base, and no further significant coronavirus-related disruptions to production or distribution.

In that environment, he said, the company anticipates third-quarter adjusted EBIT of \$0.5 billion to \$1.5 billion, reflecting economic effects of the pandemic; year-over-year weaker global demand for new vehicles, parts and services; and a lower profit from Ford Credit than a year ago.

Ford plans to report third-quarter 2020 financial results on Oct. 28.

The company said its initial **outlook for Q4**, which features three significant product launches delayed by the coronavirus shutdown earlier this year, is an adjusted EBIT loss. That reflects normal effects on volumes from downtime, changeover and ramp up for the all-new F-150, together with continued lower overall industry units. Wholesales of Mustang Mach-E and Bronco Sport, which will also start shipping to customers in the fourth quarter, will not have a material effect on the company's Q4 results. Fourth-quarter profits at Ford Credit are anticipated to be lower than in the prior year.

For **full-year 2020**, Ford expects an adjusted EBIT loss.

###

#### About Ford Motor Company

Ford Motor Company (NYSE: F) is a global company based in Dearborn, Michigan. The company designs, manufactures, markets and services a full line of Ford cars, trucks, SUVs, electrified vehicles and Lincoln luxury vehicles, provides financial services through Ford Motor Credit Company and is pursuing leadership positions in electrification; mobility solutions, including self-driving services; and connected services. Ford employs approximately 188,000 people worldwide. For more information regarding Ford, its products and Ford Motor Credit Company, please visit corporate.ford.com.

#### **Cautionary Note on Forward-Looking Statements**

Statements included or incorporated by reference herein may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on expectations, forecasts, and assumptions by our management and involve a number of risks, uncertainties, and other factors that could cause actual results to differ materially from those stated, including, without limitation:

- Ford and Ford Credit's financial condition and results of operations have been and may continue to be adversely affected by public health issues, including epidemics or pandemics such as COVID-19;
- Ford's long-term competitiveness depends on the successful execution of global redesign and fitness actions;
- Ford's vehicles could be affected by defects that result in delays in new model launches, recall campaigns, or increased warranty costs;
- Ford may not realize the anticipated benefits of existing or pending strategic alliances, joint ventures, acquisitions, divestitures, or new business strategies;
- Operational systems, security systems, and vehicles could be affected by cyber incidents;
- Ford's production, as well as Ford's suppliers' production, could be disrupted by labor is sues, natural or man-made disasters, financial distress, production difficulties, or other factors;
- Ford's ability to maintain a competitive cost structure could be affected by labor or other constraints;
- Ford's ability to attract and retain talented, diverse, and highly skilled employees is critical to its success and competitiveness;
- Ford's new and existing products and mobility services are subject to market acceptance;
- Ford's results are dependent on sales of larger, more profitable vehicles, particularly in the United States;
- With a global footprint, Ford's results could be adversely affected by economic, geopolitical, protectionist trade policies, or other events, including tariffs and Brexit;
- Industry sales volume in any of our key markets can be volatile and could decline if there is a financial crisis, recession, or significant geopolitical event;
- Ford may face increased price competition or a reduction in demand for its products resulting from industry excess capacity, currency fluctuations, competitive actions, or other factors;
- Fluctuations in commodity prices, foreign currency exchange rates, interest rates, and market value of our investments can have a significant effect on results;
- Ford and Ford Credit's access to debt, securitization, or derivative markets around the world at competitive rates or in sufficient amounts could be affected by credit rating downgrades, market volatility, market disruption, regulatory requirements, or other factors;
- Ford's receipt of government incentives could be subject to reduction, termination, or clawback;
- Ford Credit could experience higher-than-expected credit losses, lower-than-anticipated residual values, or higher-than-expected return volumes for leased vehicles;
- Economic and demographic experience for pension and other postretirement benefit plans (e.g., discount rates or investment returns) could be worse than Ford has assumed;
- Pension and other postretirement liabilities could adversely affect Ford's liquidity and financial condition;
- Ford could experience unusual or significant litigation, governmental investigations, or adverse publicity arising out of alleged defects in products, perceived environmental impacts, or otherwise;
- Ford may need to substantially modify its product plans to comply with safety, emissions, fuel economy, autonomous vehicle, and other regulations that may change in the future;
- Ford and Ford Credit could be affected by the continued development of more stringent privacy, data use, and data protection laws and regulations as well as consumer expectations for the safeguarding of personal information; and
- Ford Credit could be subject to new or increased credit regulations, consumer protection regulations, or other regulations.

We cannot be certain that any expectation, forecast, or assumption made in preparing forward-looking statements will prove accurate, or that any projection will be realized. It is to be expected that there may be differences between projected and actual results. Our forward-looking statements speak only as of the date of their initial issuance, and we do not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events, or otherwise. For additional discussion, see "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2019, as updated by our subsequent filings with the Securities and Exchange Commission.

#### **Conference Call Details**

Ford Motor Company (NYSE:F) and Ford Motor Credit Company released their 2020 second-quarter financial results at 4:05 p.m. ET on Thursday, July 30. Following the release, Jim Hackett, Ford president and chief executive officer; Jim Farley, Ford chief operating officer; Tim Stone, Ford chief financial officer; and members of Ford's senior management team will host a conference call at 5:00 p.m. ET to discuss the results. The presentation and supporting materials will be available at <a href="mailto:shareholder.ford.com">shareholder.ford.com</a>. Representatives of the investment community will have the opportunity to ask questions on the call.

Ford Earnings Call: 5:00 p.m. ET, Thursday, July 30

Toll-Free: 1.877.870.8664 International: 1.970.297.2423 Passcode: Ford Earnings

Web: www.shareholder.ford.com

#### **REPLAY**

Available after 8:00 p.m. ET on July 30 through Aug. 5

Web: www.shareholder.ford.com

Toll-Free: 1.855.859.2056 International: 1.404.537.3406 Conference ID: 6694664

The following applies to the information throughout this release:

- See tables later in this release for the nature and amount of special items, and reconciliations of the non-GAAP
  financial measures designated as "adjusted" to the most comparable financial measures calculated in accordance
  with U.S. generally accepted accounting principles ("GAAP").
- Wholesale unit sales and production volumes include Ford brand and Jiangling Motors Corporation ("JMC") brand vehicles produced and sold in China by our unconsolidated affiliates; revenue does not include these sales. See materials supporting the July 30, 2020, conference call at <a href="mailto:shareholder.ford.com">shareholder.ford.com</a> for further discussion of wholesale unit volumes.

#### Non-GAAP Financial Measures That Supplement GAAP Measures

We use both GAAP and non-GAAP financial measures for operational and financial decision making, and to assess Company and segment business performance. The non-GAAP measures listed below are intended to be considered by users as supplemental information to their equivalent GAAP measures, to aid investors in better understanding our financial results. We believe that these non-GAAP measures provide useful perspective on underlying business results and trends, and a means to assess our period-over-period results. These non-GAAP measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. These non-GAAP measures may not be the same as similarly titled measures used by other companies due to possible differences in method and in items or events being adjusted.

- Company Adjusted EBIT (Most Comparable GAAP Measure: Net income attributable to Ford) Earnings before interest and taxes (EBIT) excludes interest on debt (excl. Ford Credit Debt), taxes and pre-tax special items. This non-GAAP measure is useful to management and investors because it allows users to evaluate our operating results aligned with industry reporting. Pre-tax special items consist of (i) pension and OPEB remeasurement gains and losses, (ii) significant personnel expenses, dealer-related costs, and facility-related charges stemming from efforts to match production capacity and cost structure to market demand and changing model mix, and (iii) other items that we do not necessarily consider to be indicative of earnings from ongoing operating activities. When we provide guidance for adjusted EBIT, we do not provide guidance on a net income basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB remeasurement gains and losses
- Company Adjusted EBIT Margin (Most Comparable GAAP Measure: Company Net Income Margin) Company Adjusted EBIT margin is Company Adjusted EBIT divided by Company revenue. This non-GAAP measure is useful to management and investors because it allows users to evaluate our operating results aligned with industry reporting.
- Adjusted Earnings Per Share (Most Comparable GAAP Measure: Earnings Per Share) Measure of Company's diluted net earnings per share adjusted for impact of pre-tax special items (described above), tax special items and restructuring impacts in noncontrolling interests. The measure provides investors with useful information to evaluate performance of our business excluding items not indicative of the underlying run rate of our business. When we provide guidance for adjusted earnings per share, we do not provide guidance on an earnings per share basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to yearend, including pension and OPEB remeasurement gains and losses.
- Adjusted Effective Tax Rate (Most Comparable GAAP Measure: Effective Tax Rate) Measure of Company's tax rate excluding pre-tax special items (described above) and tax special items. The measure provides an ongoing effective rate which investors find useful for historical comparisons and for forecasting. When we provide guidance for adjusted effective tax rate, we do not provide guidance on an effective tax rate basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB remeasurement gains and losses.
- Company Adjusted Free Cash Flow (FCF) (Most Comparable GAAP Measure: Net Cash Provided By / (Used In) Operating Activities) Measure of Company's operating cash flow excluding Ford Credit's operating cash flows. The measure contains elements management considers operating activities, including Automotive and Mobility capital spending, Ford Credit distributions to its parent, and settlement of derivatives. The measure excludes cash outflows for funded pension contributions, global redesign (including separations), and other items that are considered operating cash flows under GAAP. This measure is useful to management and investors because it is consistent with management's assessment of the Company's operating cash flow performance. When we provide guidance for Company Adjusted FCF, we do not provide guidance for net cash provided by/(used in) operating activities because the GAAP measure will include items that are difficult to quantify or predict with reasonable certainty, including cash flows related to the Company's exposures to foreign currency exchange rates and certain commodity prices (separate from any related hedges), Ford Credit's operating cash flows, and cash flows related to special items, including separation payments, each of which individually or in the aggregate could have a significant impact to our net cash provided by/(used in) our operating activities.
- Adjusted ROIC Calculated as the sum of adjusted net operating profit after cash tax from the last four quarters, divided by
  the average invested capital over the last four quarters. This calculation provides management and investors with useful
  information to evaluate the Company's after-cash tax operating return on its invested capital for the period presented.
  Adjusted net operating profit after cash tax measures operating results less special items, interest on debt (excl. Ford Credit
  Debt), and certain pension/OPEB costs. Average invested capital is the sum of average balance sheet equity, debt (excl. Ford
  Credit Debt), and net pension/OPEB liability.

Note: Calculated results may not sum due to rounding

### Net Income Reconciliation To Adjusted EBIT (\$M)

		22	First	Half	Memo:
	2019	2020	2019	2020	FY 2019
