

The Dighaler® Family of Inhalers: Designed to deliver both medicine and objective inhaler use data

The innovative Dighaler® technology includes built-in sensors that track how often an inhaler is used and measure inspiratory flow. Inhaler use is recorded as an event when the cap is opened or a patient inhales.

This data is sent directly to the Dighaler® app via Bluetooth® wireless technology, giving patients the ability to share their data with healthcare professionals, who can assess how often patients use their inhalers, as well as the inspiratory flow which may help them assess if inhaler technique might need improvement.

Every Dighaler® device has:

AirDuo® Dighaler® is a digital maintenance inhaler used to control symptoms of asthma and to prevent symptoms such as wheezing in people 12 years of age and older. AirDuo® Dighaler® is not used to relieve sudden breathing problems from asthma and will not replace the need for a rescue inhaler.

Do not use AirDuo® Dighaler® if you have a severe allergy to milk proteins or if you are allergic to any of the ingredients in the product. Ask your healthcare provider if you are not sure. Please see more safety information below.

Seeing when and how often patients use their rescue inhalers* can help healthcare professionals assess if their events are increasing

The Dighaler® app notifies patients when they have more than 12 ProAir® Dighaler® events (when the cap is opened or a patient inhales) in one day

ProAir® Dighaler® is the first and only digital rescue inhaler indicated in patients four years or older for the treatment or prevention of bronchospasm who have reversible obstructive airway disease, and for prevention of exercise-induced bronchospasm (EIB).

Do not use ProAir® Dighaler® if you are allergic to albuterol sulfate, lactose, milk proteins, or any of the ingredients in ProAir® Dighaler®. Ask your healthcare provider if you have any questions or are not sure. Please see more safety information below.

*Inhaler use is recorded as an event when the cap is opened or a patient inhales.

Data on maintenance inhaler use* may help healthcare professionals assess if patients are taking their medication as prescribed

Patients can choose to receive alerts that remind them to take their AirDuo® Dighaler® or ArmonAir® Dighaler® maintenance medications

ArmonAir® Dighaler® is a digital maintenance inhaler for the long-term treatment of asthma in patients 12 years and older. ArmonAir® Dighaler® is not used to relieve sudden breathing problems from asthma and will not replace the need for a rescue inhaler.

Do not use ArmonAir® Dighaler® if you have a severe allergy to milk proteins or if you are allergic to any of the ingredients in the product. Ask your healthcare provider if you are not sure. Please see more safety information below.

*Inhaler use is recorded as an event when the cap is opened or a patient inhales.

APPROVED USES FOR PROAIR® DIGIHALER®

ProAir® Dighaler® (albuterol sulfate) Inhalation Powder is a prescription medicine used in people 4 years of age and older to:

- treat or prevent bronchospasm in people who have reversible obstructive airway disease
- prevent exercise-induced bronchospasm

ProAir Dighaler contains a built-in electronic module that detects, records and stores inhaler event information. ProAir Dighaler may be used with, and transmits information to, a mobile app. ProAir Dighaler does not need to be connected to the mobile app in order for patients to take their medicine.

IMPORTANT SAFETY INFORMATION FOR PROAIR® DIGIHALER®

- **Do not use ProAir Dighaler (albuterol sulfate) Inhalation Powder if you are allergic to albuterol sulfate, lactose, milk proteins, or any of the ingredients in ProAir Dighaler. Ask your healthcare provider if you have any questions or are not sure**
- **Before using ProAir Dighaler, tell your healthcare provider about all of your medical conditions, including if you:**
 - have heart problems
 - have high blood pressure (hypertension)
 - have convulsions (seizures)
 - have thyroid problems
 - have diabetes
 - have low potassium levels in your blood
 - are pregnant or planning to become pregnant
 - are breastfeeding or planning to breastfeed
- **Tell your healthcare provider about all the medicines you take, especially:**
 - other inhaled medicines or asthma medicines
 - beta blocker medicines
 - diuretics
 - digoxin
 - monoamine oxidase inhibitors
 - tricyclic antidepressants
- **Do not increase your dose or take extra doses of ProAir Dighaler without first talking to your healthcare provider**
- **Get medical help right away if ProAir Dighaler no longer helps your symptoms, your symptoms get worse or you need to use your inhaler more often**
- While you are using ProAir Dighaler, **do not use other inhaled rescue medicines and asthma medicines unless your healthcare provider tells you to do so**
- **ProAir Dighaler may cause serious side effects, including:**
 - **worsening trouble breathing, coughing and wheezing (paradoxical bronchospasm).** If this happens, stop using ProAir Dighaler and call your healthcare provider or get emergency help right away. This is more likely to happen with your first use of a new asthma inhalation medicine
 - **heart problems, including faster heart rate and higher blood pressure**
 - **possible death in people with asthma who use too much ProAir Dighaler**
 - **allergic reactions.** Call your healthcare provider right away if you have the following symptoms of an allergic reaction:
 - itchy skin
 - swelling beneath your skin or in your throat
 - rash
 - worsening trouble breathing
 - **changes in laboratory values (sugar, potassium)**
- The most common side effects of ProAir Dighaler include:
 - back pain
 - body aches and pain
 - upset stomach
 - sinus headache
 - urinary tract infection
 - your heart feels like it is pounding or racing (palpitations)
 - chest pain
 - fast heart rate
 - shakiness
 - nervousness
 - headache
 - dizziness
 - sore throat
 - runny nose
- These are not all of the possible side effects of ProAir Dighaler. For more information, ask your healthcare provider or pharmacist
- You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088

Please read the full **Prescribing Information** for ProAir Dighaler.

COMBINED APPROVED USES AND IMPORTANT SAFETY INFORMATION FOR AIRDUO® DIGIHALER® AND ARMONAIR® DIGIHALER®

APPROVED USES

- **AIRDUO® DIGIHALER®** (fluticasone propionate and salmeterol) inhalation powder is a prescription medicine used to control symptoms of asthma and to prevent symptoms such as wheezing in people 12 years of age and older.
- **ARMONAIR® DIGIHALER®** (fluticasone propionate) inhalation powder is a prescription medicine for the long-term treatment of asthma in patients 12 years and older.
- **AIRDUO DIGIHALER and ARMONAIR DIGIHALER** are not used to relieve sudden breathing problems from asthma and won't replace a rescue inhaler.

AIRDUO DIGIHALER and ARMONAIR DIGIHALER each contain a built-in electronic module that records and stores information about inhaler events. AIRDUO DIGIHALER and ARMONAIR DIGIHALER may be used with, and transmit information to, a mobile App. AIRDUO DIGIHALER and ARMONAIR DIGIHALER **do not need to be connected to the app in order for you to take your medicine.**

IMPORTANT SAFETY INFORMATION

- **AIRDUO DIGIHALER** contains salmeterol. Long-acting beta₂-agonist (LABA) medicines such as salmeterol when used alone increase the risk of hospitalizations and death from asthma problems. **AIRDUO DIGIHALER** contains an inhaled corticosteroid (ICS) and a LABA. When an ICS and a LABA are used together, there is not a significant increased risk in hospitalizations and death from asthma problems.
- **Do not use AIRDUO DIGIHALER or ARMONAIR DIGIHALER to treat sudden breathing problems from asthma.** Always have a rescue inhaler with you to treat sudden symptoms.
- **Do not use AIRDUO DIGIHALER or ARMONAIR DIGIHALER if you have a severe allergy to milk proteins or if you are allergic to any of the ingredients in the product. Ask your healthcare provider if you are not sure.**
- **Do not use AIRDUO DIGIHALER or ARMONAIR DIGIHALER more often than prescribed.**
- **Do not take AIRDUO DIGIHALER with other medicines that contain a LABA for a rescue.**
- **Tell your healthcare provider about all the medicines you take and about all of your health conditions.**
- **Do not stop using ARMONAIR DIGIHALER, even if you are feeling better, unless your healthcare provider tells you to.** If you miss a dose of ARMONAIR DIGIHALER, just skip that dose. Take your next dose at your usual time. Do not take 2 doses at 1 time.
- **AIRDUO DIGIHALER and ARMONAIR DIGIHALER can cause serious side effects, including:**
 - **Fungal infection in your mouth or throat (thrush).** Rinse your mouth with water without swallowing after using AIRDUO DIGIHALER or ARMONAIR DIGIHALER to help reduce your chance of getting thrush.
 - **Weakened immune system and increased chance of getting infections (immunosuppression).** You should avoid exposure to chickenpox and measles, and, if exposed, tell your healthcare provider right away. Worsening of existing tuberculosis, fungal, bacterial, viral, or parasitic infections, or herpes infection of the eye (ocular herpes simplex) may occur.
 - **Reduced adrenal function.** This can happen when you stop taking an oral corticosteroid (such as prednisone) and start taking a medicine containing an ICS (such as AIRDUO DIGIHALER or ARMONAIR DIGIHALER). During this transition period, when your body is under stress such as from fever, trauma (such as a car accident), infection, or surgery, adrenal insufficiency can get worse and may cause death. Symptoms of adrenal insufficiency include:
 - feeling tired
 - lack of energy
 - weakness
 - nausea and vomiting
 - low blood pressure
 - For AIRDUO DIGIHALER, there may be **worsening breathing problems immediately after inhaling your medicine.** If you have sudden breathing problems immediately after inhaling your medicine, stop using AIRDUO DIGIHALER and call your healthcare provider right away.
 - **Serious allergic reactions.** Stop using AIRDUO DIGIHALER or ARMONAIR DIGIHALER and call your healthcare provider or get emergency medical care if you get any of the following symptoms of a serious allergic reaction:
 - rash
 - hives
 - swelling of your face, mouth, and tongue
 - breathing problems
 - **AIRDUO DIGIHALER can also cause additional serious side effects, including:**
 - **Effects on the heart**
 - increased blood pressure
 - a fast or irregular heartbeat
 - chest pain
 - **Effects on the nervous system**
 - tremor
 - nervousness
 - **AIRDUO DIGIHALER and ARMONAIR DIGIHALER can cause:**
 - **Bone thinning or weakness (osteoporosis)**
 - **Slowed growth in children.** A child's growth should be checked often.
 - **Eye problems including glaucoma and cataracts.** You should have regular eye exams while using AIRDUO DIGIHALER or ARMONAIR DIGIHALER.
 - For AIRDUO DIGIHALER, **changes may occur in laboratory blood values (sugar, potassium, certain types of white blood cells)**
 - For AIRDUO DIGIHALER **increased wheezing (bronchospasm) may occur.** Increased wheezing can happen right away after using ARMONAIR DIGIHALER. If this occurs, stop using ARMONAIR DIGIHALER and call your healthcare provider. Always have a rescue inhaler with you to treat sudden wheezing.
- **Common side effects of AIRDUO DIGIHALER and ARMONAIR DIGIHALER include:**
 - thrush in your mouth or throat. Rinse your mouth with water without swallowing after use to help prevent this.
 - headache
 - cough
- Additionally, AIRDUO DIGIHALER has **common side effects of:**
 - back pain
 - infection of nose and throat (nasopharyngitis)
- **ARMONAIR DIGIHALER** has common side effects of:
 - upper respiratory tract infection
 - infection or inflammation of nose and throat (nasopharyngitis)
- These are not all the possible side effects of AIRDUO DIGIHALER and ARMONAIR DIGIHALER. Call your healthcare provider for medical advice about side effects.
- You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.
