*2020 segment guidance is reflective of new business perimeters previously announced in 2019.*

*Businesses with ~\$120 million of revenue in 2019, most of which was in Surface Technologies, are now included in Technip Energies guidance for 2020.*

## TechnipFMC

- ▶ **Corporate expense, net** \$130 – 150 million
- ▶ **Net interest expense** \$80 – 90 million  
*(excluding the impact of revaluation of partners' mandatorily redeemable financial liability)*
- ▶ **Tax provision, as reported** \$80 – 90 million
- ▶ **Capital expenditures** approximately \$300 million
- ▶ **Free cash flow** \$0 – 150 million  
*(cash flow from operations less capital expenditures)*

**All segment guidance assumes no further material degradation from COVID-19 related impacts**

<sup>1</sup>Our guidance measures EBITDA margin (excluding amortization related impact of purchase price accounting, and other charges and credits), corporate expense, net, net interest expense (excluding the impact of revaluation of partners' mandatorily redeemable financial liability), and free cash flow are non-GAAP financial measures. We are unable to provide a reconciliation to a comparable GAAP measure on a forward-looking basis without unreasonable effort because of the unpredictability of the individual components of the most directly comparable GAAP financial measure and the variability of items excluded from such measure. Such information may have a significant, and potentially unpredictable, impact on our future financial results.

**Charges and Credits**

In addition to financial results determined in accordance with U.S. generally accepted accounting principles (GAAP), the third quarter 2020 Earnings Release also includes non-GAAP financial measures (as defined in Item 10 of Regulation S-K of the Securities Exchange Act of 1934, as amended) and describes performance on a year-over-year basis against 2019 results and measures. Net income, excluding charges and credits, as well as measures derived from it (including Diluted EPS, excluding charges and credits; Income before net interest expense and taxes, excluding charges and credits ("Adjusted Operating profit"); Depreciation and amortization, excluding charges and credits; Earnings before net interest expense, income taxes, depreciation and amortization, excluding charges and credits ("Adjusted EBITDA"); and net cash) are non-GAAP financial measures. Management believes that the exclusion of charges and credits from these financial measures enables investors and management to more effectively evaluate TechnipFMC's operations and consolidated results of operations period-over-period, and to identify operating trends that could otherwise be masked or misleading to both investors and management by the excluded items. These measures are also used by management as performance measures in determining certain incentive compensation. The foregoing non-GAAP financial measures should be considered by investors in addition to, not as a substitute for or superior to, other measures of financial performance prepared in accordance with GAAP. The following is a reconciliation of the most comparable financial measures under GAAP to the non-GAAP financial measures.

Net (debt) cash, is a non-GAAP financial measure reflecting cash and cash equivalents, net of debt. Management uses this non-GAAP financial measure to evaluate our capital structure and financial leverage. We believe net debt, or net cash, is a meaningful financial measure that may assist investors in understanding our financial condition and recognizing underlying trends in our capital structure. Net (debt) cash should not be considered an alternative to, or more meaningful than, cash and cash equivalents as determined in accordance with U.S. GAAP or as an indicator of our operating performance or liquidity.
