## **Kimball Electronics Reports First Quarter Fiscal 2022 Results Company Reiterates Guidance For Fiscal Year 2022, Driven By Strong Second Half**

JASPER, Ind., November 3, 2021 (BUSINESS WIRE) – Kimball Electronics, Inc. (Nasdaq: KE) today announced financial results for the first quarter ended September 30, 2021.

“I am proud of our people, our company, and the results for Q1, considering the difficult operating environment caused by issues in the global supply chain. Component shortages, which are impacting companies worldwide, continue to make it challenging to keep pace with strong market demand. We were disappointed by the lack of improvement in the overall situation in the September ending quarter, when we were actually expecting some level of recovery. Conditions deteriorated in the period due to COVID related restrictions in Malaysia, and the worsening of the backlog in U.S. west coast ports.

While these supply chain challenges had a more significant impact on absorption than anticipated, we are committed to retaining our experienced and talented workforce around the world as we see these disruptions as a short-term issue. As supply constraints ease, we are well positioned to ramp production on our record backlog and support our strong funnel of new product introductions. We are reiterating our guidance for fiscal 2022, although the bifurcation between the first and second halves will be more pronounced.”
