

THE SPACE REPORT

SPACE FOUNDATION

The Space Report 2022 Q2 shows 9% growth of global space economy over the last year's number of \$431 billion. The new global space economy number, \$469 billion couples with new records for successful launches and payloads, commercial revenues, and government spending on space.

Today most of the money generated by the space industry comes from the commercial sector, which saw a 6.4% boost in revenues of \$362 billion (which is 77% of \$469 billion global space economy). Of that amount more than \$224 billion is from products and services delivered by space firms. Nearly \$138 billion was spent on infrastructure and support for commercial space enterprises.
