### **Definitions:**

"Loan-to-value ratio": Generally based on the initial loan amount divided by the as-is appraised value as of the date the loan was originated or by the current principal amount as of the date of the most recent as-is appraised value. For the CMBS B-Pieces, LTV is based on the weighted average LTV of the underlying loan pool.

"Distributable Earnings": Distributable Earnings, a measure that is not prepared in accordance with GAAP, is a key indicator of the Company's ability to generate sufficient income to pay its quarterly dividends and in determining the amount of such dividends, which is the primary focus of yield/income investors who comprise a significant portion of the Company's investor base. Accordingly, the Company believes providing Distributable Earnings on a supplemental basis to its net income as

determined in accordance with GAAP is helpful to its stockholders in assessing the overall performance of the Company's business.

The Company defines Distributable Earnings as net income (loss) attributable to stockholders or, without duplication, owners of the Company's subsidiaries, computed in accordance with GAAP, including realized losses not otherwise included in GAAP net income (loss) and excluding (i) non-cash equity compensation expense, (ii) depreciation and amortization, (iii) any unrealized gains or losses or other similar non-cash items that are included in net income for the applicable reporting period, regardless of whether such items are included in other comprehensive income or loss, or in net income, and (iv) one-time events pursuant to changes in GAAP and certain material non-cash income or expense items agreed upon after discussions between the Company's manager and board of directors and after approval by a majority of the Company's independent directors. The exclusion of depreciation and amortization from the calculation of Distributable Earnings only applies to debt investments related to real estate to the extent the Company forecloses upon the property or properties underlying such debt investments.

Distributable Earnings should not be considered as a substitute for GAAP net income or taxable income. The Company cautions readers that its methodology for calculating Distributable Earnings may differ from the methodologies employed by other REITs to calculate the same or similar supplemental performance measures, and as a result, the Company's reported Distributable Earnings may not be comparable to similar measures presented by other REITs.
