Compucom commissioned Atomik Research to conduct an online survey of 2,404 fulltime workers throughout the United States who work at companies that employ 1,000 or more employees. The overall sample consists of three subsamples that are categorized by participants reported working environment — fully remote, fully in-office and hybrid.

The overall sample has a margin of error of +/- 2 percentage points with a confidence interval of 95 percent. The margin of error of each of the three subsamples is +/- 3 percentage points with a confidence interval of 95 percent. Fieldwork took place between September 11 and September 18, 2023.

Atomik Research is an independent, creative market research agency.
