BOSTON - May 1, 2025 - Acadian Asset Management Inc. (NYSE: AAMI) reports its results for the first quarter ended March 31, 2025.

Kelly Young, Acadian Asset Management Inc.'s President and Chief Executive Officer, said, "We're pleased that in a challenging market environment, Acadian delivered positive \$3.8 billion of NCCF in the first quarter of 2025, representing our best start to a year in almost 20 years. Our organic growth reflects strength and momentum in the business. Acadian has been a leading systematic manager for nearly 40 years, providing our clients with sustained outperformance through various and complex market cycles. In a period of uncertainty, Acadian will stay consistent with our time-tested investment process and will continue to execute our growth strategy, remaining focused on expense discipline.

In the first quarter of 2025, Acadian produced ENI earnings per share of \$0.54 compared to \$0.44 in the first quarter of last year. ENI for the first quarter of 2025 was \$20.3 million, compared to \$17.4 million in the first quarter of 2024. The 17% increase in ENI compared to last year was primarily driven by revenue growth, due to higher AUM from market return and positive NCCF over the last 12 months. The year-over-year 23% increase in ENI earnings per share was additionally driven by the Company's accretive share repurchases in both 2024 and Q1 2025.

Acadian's long-term investment performance remained strong. As of March 31, 2025, 95%, 94% and 95% of Acadian's strategies by revenue beat their respective benchmarks over the prior 3-, 5-, and 10- year periods, respectively.

Turning to capital management, we had a cash balance of approximately \$120 million as of March 31, 2025. Acadian's revolving credit facility outstanding balance was \$80 million as of March 31, 2025. This revolving facility supports Acadian's first quarter seasonal needs and, as in prior years, is expected to be fully paid down by year-end. During the first quarter of 2025, we repurchased 0.8 million shares of common stock, which represented a 2.0% reduction in our total shares outstanding since the end of 2024, for an aggregate total of \$19.4 million. As our business generates strong free cash flow, we expect to maintain a strong balance sheet to support organic growth and to return excess capital to shareholders."

Dividend Declaration

The Company's Board of Directors approved a quarterly interim dividend of \$0.01 per share payable on June 27, 2025 to shareholders of record as of the close of business on June 13, 2025.

Equity Alternatives

Enhanced Equity: Vast Market Opportunity

- Enhanced Equity is one of Acadian's key product initiatives to drive long term growth
- Recent flows have been robust, end of Q1'25 AUM of ~\$12B doubled from prior year, expected to continue meaningful growth in the future
- Enhanced Equity strategies address investors' increasing demand for consistent, low-risk alpha at fees below those of fully active strategies
- Targeting investors in the ~\$16 trillion global passive equity market who are seeking improved performance with modest incremental risk

Enhanced Equity: Proven Acadian Advantage

- Enhanced Equity strategies designed to repackage Acadian's alpha in a lower risk manner to meet market demand
- These strategies leverage Acadian's proprietary investment process to invest in benchmark stocks and deliver attractive risk-adjusted returns with low tracking error
- Current notable implementations include Russell 1000, MSCI ACWI, and MSCI EM

Enhanced Equity: Robust Results

- Acadian's Enhanced Equity targets stable alpha with low active risk and has produced consistent outperformance

Definitions and Additional Notes

References to “Acadian Asset Management”, “Acadian”, “AAMI” or the “Company” refer to Acadian Asset Management Inc.; references to “Hold Co” refer to AAMI and its subsidiaries excluding Acadian Asset Management LLC (“Acadian LLC”). The Company currently operates its business through one asset management firm, Acadian LLC. The Company’s distribution activities are conducted in various jurisdictions through affiliated companies in accordance with local regulatory requirements.

The Company uses a non-GAAP performance measure referred to as economic net income (“ENI”) to represent its view of the underlying economic earnings of the business. ENI is used to make resource allocation decisions, determine appropriate levels of investment or dividend payout, manage balance sheet leverage, determine Acadian LLC variable compensation and equity distributions, and incentivize management. The Company’s ENI adjustments to U.S. GAAP include both reclassifications of U.S. GAAP revenue and expense items, as well as adjustments to U.S. GAAP results, primarily to exclude non-cash, non-economic expenses, or to reflect cash benefits not recognized under U.S. GAAP.

The Company re-categorizes certain line items on the income statement to:

- exclude the effect of Fund consolidation by removing the portion of Fund revenues, expenses and investment return which is not attributable to its shareholders;
- include within management fee revenue any fees paid to Acadian by consolidated Funds;
- treat sales-based compensation as a general and administrative expense, rather than part of fixed compensation and benefits; and
- identify separately from operating expenses, variable compensation and Acadian LLC key employee distributions, which represent Acadian LLC earnings shared with Acadian LLC key employees.

The Company also makes the following adjustments to U.S. GAAP results to more closely reflect its economic results by:

- i. excluding non-cash expenses representing changes in the value of Acadian LLC equity and profit interests held by Acadian LLC key employees. These ownership interests may in certain circumstances be repurchased by the Hold Co at a value based on a pre-determined fixed multiple of trailing earnings and as such this value is carried on the Company’s balance sheet as a liability. Non-cash movements in the value of this liability are treated as compensation expense under U.S. GAAP. However, any equity or profit interests repurchased by the Hold Co can be used to fund a portion of future variable compensation awards, resulting in savings in cash variable compensation that offset the negative cash effect of repurchasing the equity.
- ii. excluding non-cash amortization or impairment expenses related to acquired goodwill and other intangibles as these are non-cash charges that do not result in an outflow of tangible economic benefits from the business.
- iii. excluding capital transaction costs, including the costs of raising debt or equity, gains or losses realized as a result of redeeming debt or equity and direct incremental costs associated with acquisitions of businesses or assets.
- iv. excluding seed capital and co-investment gains, losses and related financing costs. The net returns on these investments are considered and presented separately from ENI because ENI is primarily a measure of the Company’s earnings from managing client assets, which therefore differs from earnings generated by its investments in Acadian LLC products, which can be variable from period to period.
- v. including cash tax benefits associated with deductions allowed for acquired intangibles and goodwill that may not be recognized or have timing differences compared to U.S. GAAP.
- vi. excluding the results of discontinued operations attributable to controlling interests since they are not part of the Company’s ongoing business, restructuring costs incurred in continuing operations.
- vii. excluding deferred tax resulting from changes in tax law and expiration of statutes, adjustments for uncertain tax positions, deferred tax attributable to intangible assets and other unusual items not related to current operating results to reflect ENI tax normalization.

The Company adjusts its income tax expense to reflect any tax impact of its ENI adjustments.

Definitions and Additional Notes

Adjusted EBITDA

Adjusted EBITDA is defined as economic net income before interest, income taxes, depreciation and amortization. The Company notes that its calculation of Adjusted EBITDA may not be consistent with Adjusted EBITDA as calculated by other companies. The Company believes Adjusted EBITDA is a useful liquidity metric because it indicates the Company's ability to make further investments in its business, service debt and meet working capital requirements. Refer to the reconciliation of U.S. GAAP net income attributable to controlling interests to ENI and Adjusted EBITDA.

Segment ENI

Segment ENI represents ENI for the Company's reportable segment, calculated in accordance with the Company's definition of Economic Net Income, before income tax, interest income and interest expense.

Methodologies for calculating investment performance:

Revenue-weighted investment performance measures the percentage of management fee revenue generated by Acadian strategies which are beating benchmarks. It calculates each strategy's percentage weight by taking its estimated composite revenue over total composite revenues in each period, then sums the total percentage of revenue for strategies outperforming. Figures calculated using gross of fee strategy composite returns.

Asset-weighted investment performance measures the percentage of AUM in strategies beating benchmarks. It calculates each strategy's percentage weight by taking its composite AUM over total composite AUM in each period, then sums the total percentage of AUM for strategies outperforming. Figures calculated using gross of fee strategy composite returns.

ENI operating earnings

ENI operating earnings represents ENI earnings before Acadian LLC key employee distributions and is calculated as ENI revenue, less ENI operating expense, less ENI variable compensation. It differs from economic net income because it does not include the effects of Acadian LLC key employee distributions, net interest expense or income tax expense.

ENI operating margin

The ENI operating margin, which is calculated before Acadian LLC key employee distributions, is used by management and is useful to investors to evaluate the overall operating margin of the business without regard to the Company's various ownership levels at Acadian LLC. ENI operating margin is a non-GAAP efficiency measure, calculated based on ENI operating earnings divided by ENI revenue. The ENI operating margin is most comparable to the Company's U.S. GAAP operating margin.

ENI management fee revenue

ENI management fee revenue corresponds to U.S. GAAP management fee revenue.

ENI operating expense ratio

The ENI operating expense ratio is used by management and is useful to investors to evaluate the level of operating expense as measured against the Company's recurring management fee revenue. The Company has provided this ratio since many operating expenses, including fixed compensation & benefits and general and administrative expense, are generally linked to the overall size of the business. The Company tracks this ratio as a key measure of scale economies because in its profit sharing economic model, scale benefits both Acadian LLC employees and AAMI shareholders.

ENI earnings before variable compensation

ENI earnings before variable compensation is calculated as ENI revenue, less ENI operating expense.

Definitions and Additional Notes

ENI variable compensation ratio

The ENI variable compensation ratio is calculated as variable compensation divided by ENI earnings before variable compensation. It is used by management and is useful to investors to evaluate consolidated variable compensation as measured against the Company's ENI earnings before variable compensation. Variable compensation is usually awarded based on a contractual percentage of Acadian LLC's ENI earnings before variable compensation and may be paid in the form of cash, non-cash Acadian LLC equity or profit interests or AAMI equity. Hold Co variable compensation includes cash and AAMI equity. Non-cash variable compensation awards typically vest over several years and are recognized as compensation expense over that service period.

ENI Acadian LLC key employee distribution ratio

The Acadian LLC key employee distribution ratio is calculated as Acadian LLC key employee distributions divided by ENI operating earnings. The ENI Acadian key employee distribution ratio is used by management and is useful to investors to evaluate Acadian LLC key employee distributions as measured against the Company's ENI operating earnings. Acadian LLC key employee distributions represent the share of Acadian LLC profits after variable compensation that is attributable to Acadian LLC key employee equity and profit interests holders, according to their ownership interests. For Acadian LLC profit interest distributions, the Hold Co is entitled to an initial preference over profits after variable compensation, structured such that before a preference threshold is reached, there would be no required key employee distributions, whereas for profits above the threshold the key employee distribution amount would be calculated based on the key employee economic percentages at Acadian LLC.

U.S. GAAP operating margin

U.S. GAAP operating margin equals operating income from continuing operations divided by total revenue.

Consolidated Funds

Financial information presented in accordance with U.S. GAAP may include the results of consolidated pooled investment vehicles, or Funds, managed by Acadian LLC, where it has been determined that these entities are controlled by the Company. Financial results which are "attributable to controlling interests" exclude the impact of Funds to the extent it is not attributable to the Company's shareholders.

Reinvested income and distributions

Net flows include reinvested income and distributions. Reinvested income and distributions represent investment yield not distributed as cash, and reinvested back to the portfolios.
